Subject: Application for Software Engineering Internship

Dear Deloitte Hiring Team,

I am writing with great enthusiasm to express my keen interest in a student internship within Deloitte. As a motivated Software Engineering student with practical experience in full-stack and mobile development, I am deeply inspired by Deloitte's global impact. I believe my technical skills and passion for innovation align with your company's forward-thinking mission.

Through my academic projects and internship, I have gained hands-on experience in:

- Developing real-time, cross-platform mobile applications using **Flutter** and **Dart**
- Building scalable backend systems with **Spring Boot** and microservices architecture
- Designing responsive front-end interfaces with **React** and **Angular**
- Implementing secure authentication, API integrations, and database management
- Working in **Agile** teams using **Git**, **Docker**, **Jira**, and CI/CD pipelines

I am eager to contribute to your team's software development projects.

A quick and proactive learner, I thrive in collaborative environments. My fluency in English and intermediate French allows me to communicate effectively within international teams.

I would be honored to bring my dedication, technical foundation, and fresh perspective to your esteemed organization.

I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to Deloitte's success.

Sincerely,

Salmi Farah
